Re: Ex Parte, CG Docket No. 02-386

Dear Ms. Dortch:

The attached *ex parte* notice inadvertently referenced the wrong docket number. Please withdraw it from CG Docket No. 02-387 and include it in the public record of the above-referenced proceeding. We regret any inconvenience this error may have caused for you or your staff.

If you have any questions with regard to this filing, please contact me at 202-736-6489.

Sincerely,

Karen Reidy

Mandatory Minimum CARE Standards

Joint Presentation by
AT&T, MCI, and Sprint

December 10, 2003

What is CARE?

- CARE (Customer Account Record Exchange) is the industry standard for the exchange of critical customer information between carriers.
- For example, it is a process used to:
 - submit an end user PIC order;
 - confirm customer orders and transfers;
 - know when a local service provider has placed or removed an end user on the carrier's long distance network;
 - know who the local service provider has suspended or blocked from using the carrier's long distance network; and
 - receive notification of order failure (allowing the carrier to take corrective action and the customer to receive intended service).

Consumers Harmed By No CARE Requirements

- Lack of 100% participation in CARE causes *billing inaccuracies* and consumers believing they have been slammed/crammed.
 - Petitioners estimate that *40% to 60% of consumer billing complaints* result from insufficient CARE.
 - For example, the LSP's failure to notify an IXC that it has removed a consumer from the IXC's network results in the consumer continuing to receive bills from that IXC.
- Participation in the CARE process is *not regulated/mandated*.
 - Industry-wide participation does not exist.
 - Inconsistency among carriers causes confusion.
- There is *no reliable alternative*.

Solution: Mandatory Minimum CARE Standards

- Joint Petition requests that a small, but critical, subset of the current industry standard be mandated for all wireline carriers.
- The proposal includes:
 - Small subset of CARE codes concerning PIC selections, PIC removals, end user disconnects, and essential end user account maintenance activity;
 - Process to ensure timely, accurate, and complete exchange of this data; and
 - Recovery process to remedy incomplete or inaccurate CARE data.

Anticipated Impact: Consumers Benefit

- Substantial reduction in consumer complaints.
- Anticipated reduction in complaints will be realized only upon 100% participation in mandatory minimum CARE process by all industry participants.

Recommendation

- Issue a Notice of Proposed Rulemaking for industry-wide, mandatory minimum CARE standards.
